

## **Abstract**

- Title:** Skiing course quality comparison at selected Czech Universities
- Goal:** Is to compare the skiing Course quality at selected Czech Universities according to agreed criteria
- Methods:** The document analysis method has been used to access the general information on topic and as a way of selected criteria comparison. The main analysis area has been based on actual local legal framework, implementation of Ministerstvo školství mládeže a tělovýchovy guidelines, implementation of Národní akreditační úřad pro vysoké školy guidelines, skiing course guidelines developed by the university teachers and course textbooks. Additionally, we used the participant observation to record the organizational-systematic information about the skiing course educational strategy.
- Results:** We observed that the skiing courses at selected Czech Republic Universities differ mainly at skiing course duration as well as to certain extend in the course cost. We also noted the differences at the student allocation to the course teams, the course pass requirements and professional education of the course leads. In contrast to that there has been an alignment in number of teaching staff per the team, information shared on skiing course objectives and organization as well as on the course safety. Significant similarities were in skiing course text books content.
- Key words:** university, skiing course methodology, skiing course, skiing instructor
