

## REPORT OF BACHELOR THESIS - opponent

**Opponent's name:** Mgr. Pavla Kratochvílová

**Leadership's name:** PhDr. Ivana Vláčilová, Ph.D.

**Student's name:** Mona Skjaanes

**Title of diploma thesis:**  
Case Study of Physiotherapy Treatment of a Patient after Total Hip Replacement

**Goal of thesis:**  
The aim of the thesis is to summaries theoretical and practical aspects of physiotherapy treatment of patient after total hip replacement, due to coxarthrosis.

**1. Volume:**

* pages of text	70
* literature	30
* tables, graphs, appendices	Tables 17, Pictures 6

2. Seriousness of topics:	above average	average	under average
* theroretical knowladges		X	
* input data and their processing	X		
* used methods	X		

3. Criteria of thesis classification	evaluation			
	excellent	very good	satisfactory	unsatisfactory
degree of aim of work fulfilment	X			
depth of analysis of thesis	X			
logical constttruction of work	X			
work with literature and citations	X			
adequacy of used methods	X			
design of work (text, graphs, tablels)		X		
stylistic level	X			

**4. Usefulness of the thesis outcomes:** under-average average

**5. Comments and questions to answer:**

*There are many minor mistakes in formal editing of the thesis - missing text alignment in the block, page numbering begins in the abstract (instead of content), a different color of table 9 and 17 on page transition, different description of Picture 6 and Table 1 in the text and in the list of tables and figures. The special part is well conceived. There is a noticeable interest of the author on the topic and also patient. I appreciate the record and consideration of the subjective condition of the patient, which always affects the course and the effect of therapy. I evaluate this thesis with degree 1. Question: How can You correct the difference in the length of the lower extremities?*

**6. Recomendation for defence:** YES NO

**7. Designed classificatory degree** 1  
 according defence

**Date:** 3.5.2016
