

ANNOTATION:

The bachelor thesis focuses on the relation between knowledge of Christianity (as a religion most relevant for Czech republic) and the depth of spiritual life. In the theoretical part, the relevance and knowledge of Christianity are examined, also the problem of the spiritual life, spirituality and religiosity from the psychological and theological point of view, and also their growth. The empirical part focuses on the construction and statistical characteristics of the questionnaire of spiritual life and the test of knowledge of Christianity. Their results, collected data, hypotheses and research problem (relationship between spirituality and knowledge) are analyzed and interpreted.
