

## The abstract

The main aim of the thesis is preparation of the edition of an educational text by Simon Lomnický from Budeč. My work is aimed on the adaptation and analyse of a moralizing text by Lomnický. I have analysed his book, Instruction or The short education for young hundsman, her evolution during three centuries, differences among editions from 16th, 18th and 19th century and her dependence on source book, The sentences and educations of the great philosophes. The reflection of Lomnický's life has been changing very fast and dramatically, I have tried to find out reasons of peremptory changes.
