Mentor evaluation of diploma thesis

Student: **Konstantina Tsianou**

Mentor of the thesis: Prof. Dr. Jiří Vlček, CSc.

Year of the defence: 2016

Title of the thesis:

**PRELIMINARY ANALYSIS OF DRUG ADHERENCE OF PATIENTS SUFFERING
WITH ULCERATIVE COLITIS**

The topic of the thesis was chosen by student

Work with literature excellent.

Language skills very good.

Student invention very good.

Student worked independently.

Problems and issues were solved independently with mentor help.

Work in the lab was not available, literature review.

Results interpretation correct with small corrections.

Processing of thesis was correct with mentor corrections.

Graphical processing for the thesis very good.

Mentor comments to thesis and student approach:

We used family relationship of student to Ioannina hospital to start co-operation between Ioannina hospital and Department of Social & Clinical Pharmacy on the project of medication adherence. The student was working independently (mainly on routine activity collection of data and by translation BMQ questionnaire into the Greece language) and she collected quite a lot of data (answers to BMQ questionnaire and clinical data of respondents). After that she made good literature review and participated on the preparing of paper regarding topic of diploma work in journal: European Journal for Person Centered Healthcare 2016 Vol 4 Issue 1 pp 187-195. She had some problems to build relevant discussion.

Evaluation of diploma thesis: excellent, to defense: recommended

In Hradec Kralove 21.9.2016
