

POSUDEK VEDOUCÍHO BAKALÁŘSKÉ DIPLOMOVÉ PRÁCE

SUPERVISOR'S REPORT OF THE BACHELOR THESIS

Supervisor's name: Bc. Tomáš Modlinger

Student's name: Ahmad Albarrak

The title of the bachelor thesis:
Case study of a patient with ischemic stroke

The goal of the bachelor thesis:
To show the full kinesiological assessment, special therapy approaches and therapy effect during 7 sessions. The theoretical part explains the clinical picture, physiological, pathophysiology, aetiology, categories, pharmacotherapy and surgical intervention of the stroke. And the main goal of the practical part is to present the examinations, the therapeutic approaches and the conclusion that were made after the rehabilitation process with the patient.

1. Volume:

pages of text	90			
	41			
number of references	articles	monographs	electronic sources	other
	35	5	1	
others	figures	tables	graphs	appendices
	19	17	0	3

2. Seriousness of topics:

	above average	average	under average	unsatisfactory
theoretical knowledge	X			
input data and their processing		X		
used methods	X			

3. Criteria of thesis classification:

	degree of evaluation			
	excellent	very good	satisfactory	unsatisfactory
degree of aim of work fulfilment	X			
independence of student during process of thesis	X			
logical construction of work	X			
work with literature and citations	X			
adequacy of used methods	X			
design of work (text, graphs, tables)	X			
stylistic level		X		
<i>There are two typing errors in the goals of thesis. Only few more mistakes on the other pages.</i>				

4. Usefulness of the thesis outcomes:

under average	average
---	---

5. Comments and questions to answer:

Student worked independently during practise. Thesis fullfils all requirements. But there are several discrepancies. In initial examination, In the gait analysis is written, that patient uses one crutch with four point contact and needs therapist support, but ADL evaluation says "The patient could transfer himself alone without any external support". The same is in the final examination. So examinations don't match to each other and don't fit especially into final examination. Long-term rehabilitation plan looks more like short-term rehabilitation plan. Questions: What other pyramidal paretic signs besides the Mingazzini do you know? How would you specify long-term rehabilitation plan?

6. Recommendation for defence: NO YES

7. Designed classificatory degree Excellent
