Title: Physiotherapy in patients after Achilles tendon rupture

Supervisor: Mgr. Bohumila Horká

Number of the pages: 92

Number of attachments: 3

The year of presentation: 2015

Key words: rupture of the Achilles tendon, physiotherapy, sensomotor

The Bachelor thesis summarizes facts concerning injuries of Achilles tendon and subsequent physiotherapy.

The general section contains basic information about the leg musculoskeletal articular system and develops the theme of Achilles tendon. It deals with etiopathogenesis injury, diagnosis and treatment of Achilles tendon ruptures.

Options, methods and chosen techniques of subsequent physiotherapy, which is the main focus, are presented in the Bachelor thesis.

The practical part handles with causalities of two cases with Achilles tendon injuries treated conservatively and with surgical operation.
