

Annotation

The aim of this work is to find out how 9th grade students in Prague and in the South Bohemia region spend their leisure time and also to compare how different interests and hobbies are in this age category between those living in Prague and in the small towns. This work also aims to determine whether the pupils know where they can spend their leisure time. The work is separated into two parts, a theoretical one and a practical one.

The practical part describes the objectives and results of the research survey. The questionnaire examines the leisure time activities of 9th graders and also tries to determine whether the students are familiar with institutions and facilities that are intended for leisure activities in the regions concerned.

Key words: Adolescent, comparison, extracurricular education, leisure pedagogy, leisure activities, leisure
