Letter of recommendation for Tereza Zahradníková

Tereza Zahradníková joined our lab during her 4-month Erasmus placement in Heidelberg from October 2015 to January 2016. She worked on a project which deals with the impact of heavy metals on the activity and expression of ABC-transport proteins in the blood brain barrier. Tereza was a highly motivated and hard-working student, who did an excellent job and showed a keen interest in learning new laboratory and biomolecular techniques. Apart from this she always showed active commitment and had a lot of ideas and suggestions which enriched the project. We believe she will be an excellent addition to any research group.

Kind regards,
