Dear Simona,

We are pleased that you are interested in our visualizations.

First we refer to our Data protection notes. We assure that no direct person-related or pseudonymised user profiles are created.

<https://www.destatis.de/EN/Service/Imprint/DataProtectionDeclaration.html>

So we cannot respond to questions like "type of visitor".

We have about 17.000 requests per month and we regard it as satisfying.

The user benefit from visualization is a better understanding of complex data. And that's why we offer it.

We know that our visualizations are used for education and training. The possibility to embed some of our visualizations makes it appealing to the online media.

We wish you much success in your research.

Kind regards  
Jürgen Kiekenbeck
