

Abstract (in English):

The aim of diploma theses Educational Programs for the Digital Libraries Sphere and Digitisation on Information and Library Science Schools in the USA is to compare studying programs of chosen schools of information science and librarianship in the USA for digital libraries and digitisation sphere and according to this analysis make some recommendations for ÚISK FF UK. In the theoretical part there are competencies for that field introduced and its development in praxis and education is showed. In the practical part of the work follows the analysis of chosen american schools of information studies (universities Chapel Hill in the North Carolina, Michigan, Boston, Illinois and Syracuse), where the issues of digitisation and digital libraries are taught. Based on this analysis continues the work with some recommendations possible for using in the ÚISK FF UK.
