Leadership's name:

Mgr. Michaela Stupková

Student's name:

Christoforos koupparis

Title of diploma thesis:

Physiotherapeutic Treatment of a Patient with Diagnosis of ankle sprain.

Goal of thesis:

The aim is a further understanding of an anterior talofibular ligament sprain. Generally the structure and the function of an ankle joint by a kineziological and a biomechanical point of view. Furthermore it will be described in details a therapy plan about that diagnosis

1. Volume:

* pages of text	74
* literature	26
* tables, figures	27 tables, 8 figures, 4 fotodocumentation

2. Seriousness of topics:

	above average	average	under average
* theroretical knowladges		x	
* input data and their processing		x	
* used methods		x	

3. Criteria of thesis classification

	evaluation			
	excellent	very good	satisfactory	unsatisfactory
degree of aim of work fulfilment				x
depth of analysis of thesis			x	
logical consttruction of work			x	
work with literature and citations				x
adequacy of used methods		x		
design of work (text, graphs, tablels)			x	
stylistic level			x	

4. Usefulness of the thesis outcomes:

average

5. Comments and questions to answer:

For insufficient use of scientific literatures (see 26 literatures) on a give topic is low comprehensiveness of this thesis.

Pro nedostačující použití odborné literatury (viz 26 odborných literatur) k zadanému tématu je nízká obsáhlost této diplomové práce.

YES

7. Designed classificatory degree

Good
