

Graduation thesis called “Crisis Intervention of Children with Child Abuse and Neglect Syndrome” is purely theoretical. The first part offers a description of fundamental terms relating to the subject of Child Abuse and Neglect Syndrome, statistical data analysis, and a compendium of current legislation. The second part disserts on crisis intervention, especially on the specific form of help to abused and neglected children, and on institutional help.

Last chapter presents Sanctuary for Children in Need in Prague, its activities and cooperation with other non-governmental or public organisations.
