

Abstract

The thesis “Sacraments in the documents of the second Vatican council” deals with selected articles of the individual constitutions, documents and decrees of the council, which concern sacraments in the theological context. The articles are selected from the constitution on the Sacred Liturgy *Sacrosanctum concilium*, constitution on the Church *Lumen gentium*, pastoral constitution *Gaudium et spes*, document about the Apostolate of the Laity *Apostolicam actuositatem*, decree on Ecumenism *Unitatis redintegratio* and the decree on the life and service of priests *Presbyterorum ordinis*. The thesis is based on the acts of council and it maps the progress of creating the articles. A brief summary of history of the formation of individual constitutions, documents and decrees is mentioned before the analysis of the articles. The chapters are divided by the documents. At the end of the thesis is a chapter containing important themes concerning the Sacraments that came up from the mapping of the article.
