

Rigorous thesis "Jednotný programový dokument pro Cíl 3 regionu NUTS 2 hlavní město Praha. Implementační schéma programu JPD 3 a jeho vliv na příjemce finanční dotace" deals with the programmes co-financed from the Structural funds of the European Union in the Czech Republic, particularly with the Single Programming Document "Jednotný programový dokument pro Cíl 3 regionu NUTS 2 hlavní město Praha (JPD 3)". The main objective of this study was to prove whether there is cohesion between the administrative obligations of the implementation authorities of the JPD 3 programme on one hand and the beneficiaries of the financial support on the other, and how the rules of the JPD 3 programme influence beneficiaries while implementing concrete projects. The aim of this thesis was to evaluate whether the implementation authorities were sufficiently prepared for the launch of the JPD 3 programme, whether the JPD 3 programme rules have any impact on the implementation of projects by the beneficiaries, and if so, whether this impact is a positive or a negative one.

The thesis is based on two methodological approaches. The first one is a descriptive-analytical method based on primary sources and available literature. It assesses the regulating of the JPD 3 programme from a theoretical point of view. Due to unsatisfactory sources of information, it was also necessary to conduct further research. The aim of this research was to address directly to individual beneficiaries of the financial allocation and on the basis of their own experience prove whether it is possible to consider the theoretical judgements from the first part of the thesis as valid ones.
