

## **Abstract**

The thesis recounts the history of the village school of Velké Karlovice – Miloňov. The thesis is historical/empirical. The empirical part aims to use qualitative research to discover how the people of the region, the pupils of the school, perceived education in this hard, mountainous part of Wallachia. Their responses are compared to records of the Miloňov school chronicles. The historical part aims to present the results of a literary summary of the history of education in the Wallachia region and a comprehensive study of the history of the Miloňov Valley school. The thesis also covers the replica of the building of the Miloňov school built in the Wallachian Open Air Museum in Rožnov pod Radhoštěm. Included in the thesis is also an interview of the curator and expert guarantor responsible for the the construction of the museum replica. The replica building of the school in the Wallachian Open Air Museum offers a wide variety of educational programmes for schools. The appendix of the thesis includes a worksheet for first-graders that can be used as a part of the „Welcome to school“ event in the Museum. The Wallachian Open Air Museum offers this event at the beginning of September.
