ABSTRACT

The goal of this thesis History and value of chosen cultural sights in Odolena Voda and its surroundings in relation to historical walks is to create theoretical and practical foundation for teaching History for the students of the 5th grade, that aligns theoretical and practical education within regional history, represented by cultural monuments.

The thesis is dispensed into theoretical and practical part. The theoretical part is firstly concerning the implementation of the topic into Czech national educational curriculum secondly demographic and mainly historical characteristic of the region. The historical part is focusing on Odolena Voda town and Panenske Brezany village. My greatest attention is dedicated to cultural monuments, which are going to be presented to students.

This part is followed by practical section consisting of the key topic, which is comprising problematic of schooling due to cultural monuments as well as theory historical outings, as a chosen ways of tuition. These chapters are followed by particular proposals for historical outings in Odolena Voda and Panenske Brezany, including worksheets. The goal of outings is to connect historical topics together with particular monuments of the region and encourage students awareness of their value in the present days. The final part is dedicated to proposal to additional activities enriching the school work.
