

Abstract

The aim of this thesis is to discover the level of theoretical knowledge of first aid with students of primary and secondary schools. I would like to also discover the efficiency of teaching the first aid at school so that the students can use the gained information in their lives. I will find out the theoretical knowledge of first aid by using the quantitative research, questionnaire. It is possible to propose the changes of teaching the first aid at schools based on gathered figures in order to teach the theoretical knowledge more effectively.
