

The thesis *Národní listy 1910 – 1914* is focused on the period of ownership change of *Národní listy*, which was bought by *Pražská akciová tiskárna* (Prague share printing house) in 1910 from the family of the deceased founder Dr. Julius Grégr. The daily journal, which has retained a degree of independence, has become the official press authority of the political party *Národní strana* by this sale, mainly represented by Karel Kramář and Alois Rašín. In individual chapters, I am gradually analyzing the underlying materials from which I drew for my work by putting *Národní listy* in the context of the time and circumstances that led to the creation of the daily journal. The thesis is also aimed to the activities of the preparatory committee, which initiated and succeeded in obtaining the *Národní listy* for the *mladočeská* political party. The main part of the text deals with the business transaction itself, illustrates the financial backstage of the company *Pražská akciová tiskárna*, examines the documents that accompanied the purchase and its preparation and describes the subsequent modernisation of the whole enterprise.
